

LOUISVILLE TILE

Porcelain Tile - General Sealing

Porcelain Tile Issues

Polished Porcelain – The polishing of through body porcelain tiles increases the porosity of the material. In effect, the tile becomes more vulnerable to staining. Polished porcelain tiles should be sealed with either MP90 or MP90 Eco Plus.

Fila MP90

Fila MP90 Eco Plus

Matte & Textured Finishes – In cases where matte and textured finished porcelain tiles are too difficult to clean due to their rough surfaces, they should be treated with our protective barrier against dirt, FilaStopdirt.

Fila Stop Dirt
