

LOUISVILLE TILE

Application of Fila Sealers to Stone and Polished Porcelains

Fila Products: MP90, MP90 Eco Plus, Fila Stoneplus and Stoneplus Eco

The MP90 family is a Natural look sealer, The Fila Stone Plus family is an Enhancer Sealer

Wipe On, Wipe Off Method

- No Dilution: Ready to Use
- Pour Sealer into the paint tray
- Distribute the chemical evenly across the clean and dry surface of the material using a flat paintbrush or lambswool applicator
- Dwell Time: 10 Minutes
- After 10 minutes, wipe off product excess with a clean microfiber cloth, making sure to rub the product in, in order to help penetrate the surface.
- Stubborn residues can be removed by guiding a microfiber cloth wetted with Sealer over the residue, making sure to fully saturate the surface.
- Dry the surface with a clean microfiber towel

Before applying Sealer test it on a small section to check for a change in color

Caution: Properly ventilate the area during use and while product is drying.
